RISK REVIEW
- Pulmonary: Cough, SOB, difficulty breathing, chest pressure
- Upper tract: Sore throat, congestion, runny nose, loss smell
- Headache
- Constitutional complaints: Fatigue, muscle or body aches
- GI: Nausea, vomiting, diarrhea, abdominal complaints or upset, loss of taste
- Rash
- Vascular signs or symptoms

SYMPTOM HISTORY & CLINICAL ASSESSMENT
- PULMONARY:
  - Cough, SOB, difficulty breathing, chest pressure
- UPPER TRACT:
  - Sore throat, congestion, runny nose, loss smell
- Headache
- Constitutional complaints:
  - Fatigue, muscle or body aches
- GI:
  - Nausea, vomiting, diarrhea, abdominal complaints or upset, loss of taste
- Rash
- Vascular signs or symptoms

DIRECT EFFECTS

RISK REVIEW
- Anti-fever meds
- Symptom relief meds
- Medical risk factors
- Travel history
- Community prevalence
- Local prevalence
- Cohort prevalence
- Social/work prevalence
- Household status
- Review of close contacts
- Review of screening data

ASSESSMENT & TRIAGE FLOWCHART

FEVER ≥ 100.4°F AND/OR COVID-LIKE SYMPTOMS

VITAL SIGNS
- Temp
- Heart rate
- Blood pressure
- Resp. rate
- Pulse Ox

SYMPTOM HISTORY & CLINICAL ASSESSMENT

RISK REVIEW

RULE OUTS
- Influenza
- Strep
- Common respiratory pathogens
- Primary GI illness
- Allergies
- Other

Determine Acuity & Need for Triage to Hospital
- Initial Supportive Care Measures
- Communications

USE DATA, CLINICAL JUDGEMENT, & LOW THRESHOLD TO DETERMINE DEGREE OF SUSPICION FOR COVID ILLNESS

Moderate to High Degree of Suspicion

Low Degree of Suspicion and/or Uncertainty

Affirmatives Flowchart

Surveillance & Separation
- Conservative Approach
- Consider Test for Alternative Diagnosis

Household & cohort ok to be in school

Treat the Diagnosis

Apply Sick Policy
- 24 hour no fever
- 24 hour no anti-fever meds
- Symptoms improved or resolved in a manner consistent with diagnosis

Cleared

If Suspicion/Concerns Resolving & No Test: Apply Sick Policy
- 72 hours no fever
- 72 hours no anti-fever meds
- 72 hours no new symptoms
- 72 hours symptoms improved or resolved

If Suspicion/Concerns Resolving & Testing:
- Negative COVID PCR test
- 24HS no symptoms
- 24HS no fever
- 24HS no anti-fever meds

If Suspicion/Concerns Resolving & No Test:
- Screen 2X/day
- Low threshold to consider COVID-19 testing

If Suspicion/Concerns Increasing

Household & cohort ok to be in school

No Suspicion because alternative diagnosis explains fever or symptoms

Apply Sick Policy
- 24 hour no fever
- 24 hour no anti-fever meds
- Symptoms improved or resolved in a manner consistent with diagnosis
